Zoom Recording

You can record videos using the Zoom video conferencing software. Here is a high-level sequence of steps you will need to follow:

1. Start a meeting using the "New Meeting" tab

2. After the meeting is started, start "Recording" such that the recorded file is generated on your local computer

- 4. Open your presentation software in presentation mode and start your presentation.
- 5. Finish your presentation, and "stop sharing" your screen
- 6. Stop recording
- 7. Zoom will create an MP4 file containing your talk video. The camera's video recording will appear as an inset on the top-right corner, while the presentation slides would form the rest of the screen.
